THE 2021

This year's annual Hot List of the best new hotels from around the world is a story of resilience. Despite enormous hardship in the travel industry, exceptional properties have continued to open across the globe (nearly a thousand last year in the U.S. alone). As always with this endeavor, each of the 69 picks on this year's list was safely vetted by our international network of correspondents. But as we've learned in the past year, everything is connected, which is why we've also expanded the scope of *hot* to include restaurants, transportation, and destinations, as well as more news we're excited about set for later this year. In spite of it all, the following pages are full of successes. We think they're a pretty great way to mark the 25th anniversary of this list.

UPCOMING
openings

LIST!

LOOKING AHEAD
